

Python program for area of circle, rectangle and square using while loop. No functions. Get all inputs at runtime. Use Enter your choice with choices 1, 2, 3 and 4 for exit. Choice 1 asks radius and shows circle area only. Choice 2 asks length and breadth and shows rectangle area only. Choice 3 asks height and shows square area only. Output should be integer without decimal points.

main.py

Output

```
1 while True:
2     print("\n1. Area of Circle")
3     print("2. Area of Rectangle")
4     print("3. Area of Square")
5     print("4. Exit")
